

Independent global commodities, sourced responsibly.

CommoditiesInc is a privately owned, independent global commodities trading desk serving primary mines, agri-producers, buyers, resellers and end-buyers. Precious metals, battery and critical minerals and soft commodities — traded compliantly, with fifteen years of relationships behind every transaction. This statement is a summary for procurement review; commercial terms follow under NDA.

WHAT WE TRADE

PRECIOUS METALS

Gold & Silver

Bullion and doré from responsible, conflict-free origins under OECD Due Diligence Guidance.

- Au bullion · doré bars
- Ag bullion · industrial silver
- Traceable throughout procurement

BATTERY & CRITICAL

Lithium, PGMs & Rare Earths

Critical inputs for EV, defence and renewable supply chains.

- Platinum · palladium · PGM concentrates
- Lithium · copper
- Rare earth elements

BULK

Coal, Iron Ore & Manganese

Bulk commodities to stringent quality standards with full traceability.

- Thermal coal · anthracite
- Iron ore · manganese

SOFT

Sugar, Wheat & Urea

Soft commodities supporting food security and agricultural development.

- Sugar · wheat
- Urea and fertilizer inputs

HOW A TRANSACTION RUNS

STAGE 01 Request	You submit commodity, specification, quantity, delivery terms, destination and timeline. A complete request gets a faster, firmer answer.
STAGE 02 Verification	Both sides screened — corporate identity, UBO, sanctions exposure. Origin and title verified before product is presented.
STAGE 03 Soft Offer	Indicative pricing, procedure and terms issued. NCND protections in place before counterparties are introduced.
STAGE 04 Contract	Agreement executed with agreed payment instrument, assay/inspection regime and delivery schedule.
STAGE 05 Delivery	Logistics, documentary settlement and reconciliation. Relationships built for the long run, not a single dose.

We focus in particular on the **Platinum Group Metals and rare earths**, where South Africa's significant reserves position it as a key player in meeting evolving industrial and clean-energy demand.

COMPLIANCE

CONTROL	STANDARD APPLIED
Sourcing	OECD Due Diligence Guidance for Responsible Supply Chains applied to gold, PGMs and minerals.
Counterparty	KYC/AML and UBO verification on both sides of every transaction and throughout the value chain.
Governance	ESG best practice across sourcing and logistics; conflict-free origins prioritized.
Sanctions	Traded in compliance with applicable legislative, regulatory and international sanctions requirements.
Conduct	International best-practice non-circumvention and non-disclosure observed at all times.
